

# YOUR CABLE WASTE HAS NEVER BEEN MORE VALUABLE

Turn your leftover and end-of-life cables into a source of revenue

# Increase your profitability: let us take care of your cables!

**You don't know what to do with your cable waste? You don't want to worry about related legal obligations and constraints? We have a solution for you, that will also bring you a financial benefit.**

## CUSTOMIZED RECYCLING SOLUTION

We are not only cable experts, but also recycling experts. We have been recycling end-of-life cables for over 35 years.

By choosing Nexans recycling services you can receive money back in exchange for your leftover cables, while positively contributing to the environment.

## NEXANS, A TRUSTWORTHY PARTNER

- State-of-the-art grinding technology for copper and aluminum cables
- Turnkey logistics solutions
- Accountability and traceability for all operations.

## YOUR BENEFITS

- **Your cable waste is a source of revenue:** we buy all types of leftover cables, made of copper or aluminum.
- **Your life is made easier:** we take care of everything, from cable scrap recovery to recycling.
- **You do not need to worry about compliance:** we recycle in strict respect of regulation and legislation.
- **You contribute to circular economy:** your cable waste is turned into recycled raw materials.

## Did you know?

"When the waste is transferred from the original producer [...] to one of the natural or legal persons [...] for preliminary treatment, the responsibility for carrying out a complete recovery or disposal operation shall not be discharged as a general rule." (EU directive on waste: DIRECTIVE 2008/98/EC of 19/11/2008).

What does it mean? To give an example, you are a waste producer when you install cable in a building and there are leftovers. **Then, even if you sell your cable leftovers to a waste treatment company or scrap dealer, your responsibility is still engaged until you can prove the recycling or disposal of your waste.**

# How does it work?

## STEP 1 AGREEMENT

When Nexans buys your cable waste, a recycling and pickup agreement is signed between both parties. Full traceability and transparency is ensured before, during and after the recycling process.

## STEP 2 RECOVERY

We organize all the logistics by providing empty containers for bulk cable waste or trucks for drums, and transportation to the recycling facility.

## STEP 3 COMPENSATION

Once the process to separate and recover the non-ferrous metals from the cable waste is over, your cable scrap value is credited to your bank account.

# Valorization formula

We calculate the value of your cable scrap using a transparent formula :

$$\text{THE MONEY YOU WILL GET} \\ = \\ \text{QTY} \times ((\text{LME LOWEST} - \text{D}) \times \text{M} - (\text{T} + \text{L}))$$

**QTY** : Cable scrap quantity (tons)

**LME Lowest** : Lowest London Metal Exchange official rate, copper or aluminum (€/ton)

**D** : Discount according to the quality of the metal (€/ton)

**M** : Metal content after grinding (%)

**T** : Treatment costs (€/ton)

**L** : Logistic costs (€/ton)

Ask now for an estimated value of your cable scrap!

## Voice of customers

When our Nexans submarine cable came to the end of its service life, we needed to dispose of the spare repair length being stored on a 5m diameter drum. Nexans offered a recycling service which included the recovery of the old drum, draining the cable of oil and then stripping it down to allow the recycling of the steel and copper components. For us this turnkey service fitted our requirements exactly and from a customer's point of view we were more than satisfied with the whole project. //

**JOHN DUQUEMIN**  
CHIEF ENGINEER, JERSEY ELECTRICITY, UK

We are really happy with the first recycling operation we have conducted with Nexans: all deadlines and conditions were carefully respected. This, together with Nexans' capability to understand its customers' needs, ensured a true success of the project. We are looking forward to working again with Nexans recycling services team! //

**THIERRY CARETTE**  
PURCHASING MANAGER, TECHNORD, BELGIUM

## About Nexans

For over a century, Nexans has played a crucial role in the electrification of the planet and is committed to electrifying the future. With approximately 28,000 people in 42 countries, the Group is paving the way to a new world of safe, sustainable and decarbonized electricity that is accessible to everyone. In 2022, Nexans generated 6.7 billion euros in standard sales. The Group is a leader in the design and manufacturing of cable systems and services across four main business areas: Power Generation & Transmission, Distribution, Usage and Industry & Solutions. Nexans was the first company in its industry to create a Foundation supporting sustainable initiatives, bringing access to energy to disadvantaged communities worldwide. The Group pledged to contribute to carbon neutrality by 2030.

Nexans. Electrify the future.

Nexans is listed on Euronext Paris, compartment A.
